

The screenshot shows the Google Cloud console interface for VM instances. The left sidebar contains a navigation menu with categories like 'Virtual machines', 'Storage', 'Instance groups', and 'VM Manager'. The 'Virtual machines' category is expanded, and 'VM instances' is selected. The main content area displays the 'VM instances' page, which includes a 'Create instance' button and a 'Take the quickstart' link. A dashed cloud icon is visible in the background of the main content area.

CP2129 is MySQL Instance

Choose a Cloud SQL edition

A Cloud SQL edition determines fundamental characteristics of your instance. Choose the best edition for your price and performance needs. [Learn more](#)

Enterprise Plus

- 99.99% availability SLA
- Sub-second planned maintenance downtime
- Near-zero-downtime instance failover
- Performance-optimized machines
- Up to 35 days point-in-time recovery window
- Up to 3x higher read throughput with data cache
- Advanced disaster recovery with any architecture
- Support for managed connection pool

Enterprise

- 99.99% availability SLA
- Less than 60 seconds planned maintenance downtime
- General purpose machines
- Up to 7 days point-in-time recovery window

Choose a preset for this edition. Presets can be customized later as needed.
